

Muhammad Haider

Full-Stack & AI Engineer

muhhaider906@gmail.com | github.com/Haiderlikecodes | linkedin.com/in/muhammad-haider-697802290

PROFILE

Full-Stack and AI-focused software engineer building modern web applications, robust REST APIs, and privacy-first local chatbot workflows. Experienced with Next.js, React, Django REST Framework, Python, Node.js, SQL, and application security testing.

EXPERIENCE

Full-Stack & AI Engineering Intern | Software Development Company | Recent, 3 months

- Built full-stack web applications with Next.js and React frontends connected to Django REST APIs.
- Designed local LLM chatbot workflows for low-latency responses and complete data privacy.
- Developed responsive UI components and integrated streaming chat experiences.

Junior Pentester | Zeroinnovation | 2024 - 2026

- Conducted web application, network, and API penetration testing aligned with OWASP Top 10 and NIST practices.
- Identified SQL injection, XSS, and configuration vulnerabilities and collaborated on secure coding fixes.
- Used Burp Suite, Nmap, Metasploit, Wireshark, Python, and Bash for security assessments and automation.

SELECTED WORK

Local LLM Chatbot Integration

Privacy-first AI assistant with a Next.js interface, Django backend, custom prompt templates, streaming responses, and locally hosted language models.

Django + Next.js Platforms

Responsive products backed by maintainable REST APIs, secure authentication, SQL data models, and modern React interfaces.

Security Assessment Automation

Python and Bash tooling supporting reconnaissance, API testing, and repeatable web application security workflows.

TECHNICAL SKILLS

Frontend: Next.js, React, JavaScript, Tailwind CSS, jQuery
Backend: Django, Django REST, Python, Node.js, REST APIs
AI: Local LLMs, chatbot workflows, prompt design, streaming UI
Data: SQL, relational data modeling
Security: Burp Suite, Nmap, Metasploit, Wireshark, OWASP
Tools: Git, Postman, Linux, Bash

EDUCATION

Bachelor of Computer Science

NUML (National University of Modern Languages)

FOCUS

Private AI integrations, scalable web systems, secure APIs, and polished developer experiences.
